April 28, 2023

We are delighted to invite you to participate in 'the 8th *World Innovative Technology (WIT) Challenge*', to be held at Griffith University Australia, between 27-28 October 2023. This event is jointly organized by Griffith University and the Australian Robotics Association, and is sponsored by the Australian Computer Society, Unity and Archio.

The WIT Challenge is an international competition that brings together the best minds in robotics, coding, AR and VR to showcase their skills, talents and creativity. Participants from all over the world come to compete in a variety of categories, including Innovative Technology Challenge, Student Symposium, Immersive Experience Challenge (AR/VR), Coding, and Robot Racing (line tracing and robot sumo).

As a participant, you will have the opportunity to present your creative ideas, designs or research outcomes to a panel of expert judges, receive valuable feedback and insights, sharpen your presentation skills, and enhance your professional profile. You can also join the robot racing categories and demonstrate your capabilities in robotics.

We look forward to having you participate in the WIT Challenge and hope that you will take advantage of this opportunity to showcase your innovative solutions and make a positive impact on the world.

Should you have any enquiry about the event or any safety issues, please do not hesitate to contact me.

Yours Sincerely

Assoc. Professor **Jun H. Jo**

Director, Griffith Robotics Lab.
Chair, World Innovative Technology Challenge
President, Australia Robotics Organising Committee
